INTRODUCTION

British Columbia Public Libraries Statistics is an annual publication of the Public Library Services Branch of the Ministry of Community, Aboriginal and Women's Services. It provides a compilation of statistical and financial data summarizing the activities of British Columbia public libraries for the calendar year. The statistics are also published on the Ministry of Community, Aboriginal and Women's Services web site at:

http://www.marh.gov.bc.ca/LIBRARY/STATISTICS/

Since 1997, the statistics have been collected electronically, using a web-based survey that accepts data filed by all seventy public libraries in the province. The validity of the statistics in this publication is subject to the accuracy of the data supplied in the online Annual Survey of Public Libraries. The questions and instructions from the web-based survey are appended.

Beginning this year, selected output and performance measures, ranked alphabetically by library name and numerically by population served, are included. For the purposes of this publication, the population of a public library service area is deemed to be the population of the area from which the public library receives local government tax support.

The annual compilation of public library statistics is an important accountability, planning, and performance measurement tool for library trustees, library staff and local government officials. The Public Library Services Branch is grateful for the support and co-operation of the public libraries of the province in providing the data for this publication. As always, the Branch will be pleased to receive comments and suggestions for improvements to the publication.
